### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Objections***

Claims 1-3 are objected to because of the following informalities: Typing error in step g, incorrectly referring to a step "d" when it should refer to the prior step "f". A similar sequential misspelling of the prior step is found in steps h-j. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In step "h" the phrase "the product of (e)" lacks antecedent basis, nor is there a recited step "e" the results in a product being formed.

In step I, the phrase "the product" makes it unclear which product is being referred because the prior recited steps result in a product being formed. Additionally, the word "nano size" as used in step I provides an unclear parameter of the titanium dioxide size. For example a titanium dioxide having a diameter of 1meter can be referred as being  $1 \times 10^9$  nanometers, hence it's a nano size.

Steps K and L are dangling steps that having no nexus the former recited steps in claim 1. The claimed positive active step of "spraying" and "treating" fail to note what is being sprayed or what is being treated.

Art Unit: 1731

In claim 2, it is unclear to which "raw material" is being referred. Is it the raw material used in step "a" or after step "a"? Additionally, the term "high temperature" in claim 2 is a relative term which renders the claim indefinite. The term "high temperature" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

In claim 3, the phrase "the extraction radiation rate" lacks antecedent basis

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references in TPO-892 have been cited to show the state of the art.
